**For Immediate Release**

Date: November 5, 2009

## **Building Permits Available On-Line**

The City of Campbell can now issue certain building permits to contractors online, Chief Building Official Bill Bruckart announced today.

The following residential permits are available through Online Permits:

- Re-roofs with no structural modifications or reframing
- A new water heater or replacement (including associated piping and vents)
- A new HVAC or replacement (including associated piping and vents)
- An electrical service replacement (with a pre-existing meter)
- A furnace replacement
- Copper re-piping
- Installation of a whole house fan

Licensed Contractors can apply for these “over the counter” permits and pay the fees via the Internet. “This new feature of our Online Permits System can save you time and help keep Campbell a “green” city, since you will not have to drive to City Hall to apply or pay fees,” said Bruckart. It is estimated that about 15% of all permits can be issued online now.

To use this service:

- You must be a licensed contractor
- You must have valid Workers Compensation Insurance (or self insure)
- You must have a valid City of Campbell Business License
- You must register with City of Campbell Building Department.
- To get started, please complete our on-line application (link to application page). After you have registered and been provided a user ID and password, you may apply for the permits listed above.

“Our Information Technology staff did a great job of getting this system up and running and we are looking forward to providing this enhanced service to our customers,” Bruckart said.

To get started, click on the “Permits” link on the Building Division section of the City’s website ([www.CityofCampbell.com](http://www.CityofCampbell.com)). For more information, contact the Building Division at 408-866-2130.
